To Whom It May Concern:

re: Razvan T. Radulescu (date of birth 3/5/66)

I had the pleasure of supervising the clinical work of Razvan Radulescu during his rotation on the Neurology Service at Beth Israel Hospital from August 28 through September 22, 1989. Overall, Razvan performed at an excellent level. I was particularly impressed by his diligence, inquisitiveness and thoroughness. He blended into the Neurology team exceptionally smoothly—a remarkable achievement considering his lack of previous experience at this hospital or in this geographic region. Razvan will continue to excel in his clinical work—he seems to have a tenacious desire to fully understand concepts and clinical findings and these qualities assure him success in a future comprised of accelerating medical knowledge.
