TO WHOM IT MAY CONCERN:

This letter is to document that I would be delighted to collaborate with Dr. Razvan T. Radulescu on large-scale genomics and proteomics projects in cancer. Dr. Radulescu is an established expert in proteomic and translational aspects of human cancer, and I anticipate that our collaborative efforts will further elucidate signaling pathways in tumorigenesis and suggest novel strategies for therapeutic intervention.

Sincerely,

Victor Velculescu, M.D., Ph.D.  
Associate Professor of Oncology
