

Support for Hanten Day Today, HOPE for better Future Tomorrow

Full democracy cannot be developed in total darkness. Increasing transparency in government can lead to a Responsible, Efficient, Accountable, and Link-to-the-people (REAL) democracy to any society.

A successful scholar educated with both oriental and western knowledge and experienced in participating government in both developing and developed world now has formulated a great HOPE for a brighter future. He is running for a house representative in Oregon of USA.

His name is Hanten Day (see photos below). His HOPE for the bright future spells out as: **H**ealth care reform, **O**pen government, **P**ublic security and **E**ducation excellence, **E**qual opportunities and **E**nvironmental sustainability (see details at: http://www.votehd.com/Issues_Polls.htm).

This broad spectrum of HOPE is bold but really achievable. This is because it is based on a real OPEN and thus more democratic way of government.

However, as we all know how hard and expensive it is to run for public office in the U.S. A minority candidate faces an even harder task because she or he has to overcome many additional barriers. Hanten has chosen a path that puts supporters' money into the best use and already won the primary election. But to help him secure a winning in the November general election, more support is needed (contribution can be sent to: Friends of Hanten Day, 480 Vista Ave, SE. Salem OR 97302).

I fully endorse Hanten's HOPE, especially the Open government and Equal opportunities. I believe that transparency will provide a trusted environment that good behaviors can flourish and evil deeds will die so that true equality can be realized and seen clearly.

Thus, let us endorse Hanten's HOPE and help it to become REAL.

More information about Hanten can be found at <http://www.votehd.com> .
